CATERZAP+™

MODELS: **CZP-LED-20S, CZP-LED-40S**

by **MECHLINE**

Thank you for purchasing the CATERZAP+ LED electric grid flying insect killer.

MODEL: **CZP-LED-20S**

FINISH: Stainless Steel

RANGE OF ACTION: 40Sq M

INPUT: 220V~240V /50Hz

POWER: 14W

LAMP TYPE: 1x6W E27 shatterproof

MODEL: **CZP-LED-40S**

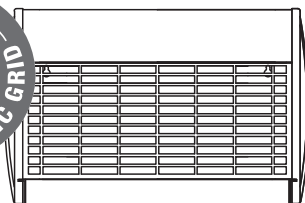

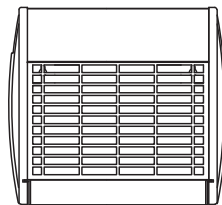

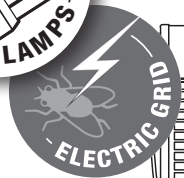

FINISH: Stainless Steel

RANGE OF ACTION: 80Sq M

INPUT: 220V~240V /50Hz

POWER: 17W

LAMP TYPE: 2x6W E27 shatterproof

GENERAL: Mechline's CATERZAP+ electric grid flying insect killer utilises energy efficient, longlife LED lamps to lure light-sensitive flying insects, such as flies, moths, mosquitoes, etc. These insects are electrocuted by the electrically-charged metal grids. There are no chemicals, no smells, no sprays and no mess. The fly killer is pollution-free and harmless to humans and pets. Ideal for use in houses, factories, food outlets, cold rooms, hospitals and other places due to the shatterproof lamps. Indoor use only.

PRECAUTIONS

1. High voltage! Disconnect power before repairing or cleaning.
2. Hang or mount in a safe place and away from children.
3. Never put metal objects inside the grids while in operation.
4. Keep away from flammable materials.
5. Check the voltage before operating. Confirm it is correct for the requirements of the fly killer.
6. If damaged, supply cords must be repaired or replaced by a qualified technician.
7. The insect killer cannot be used in garages, stables or similar places.
8. Clean the collection tray regularly.
9. When replacing the tray it is important that it is firmly closed. PUSH until tray safety microswitch aligns with a CLICK. The device is now activated.
10. Use caution when handling. Beware of possible sharp edges.
11. **Lamp(s) supplied with this unit have a clear plastic sheath around it which you should NOT attempt to remove. The sheath is integral to the lamp giving the shatterproof protection.**
12. **Lamps must be replaced after 13500 hours to ensure optimum performance of the fly killer.** This is due to the natural deterioration of UV light intensity over this time.
13. Wall cladding without UV polymer stabilisers can discolour from UV degradation.

WARNING: This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
